We assure our clients the Design Execution & Commissioning shall be with the necessary approval and as per the NFPA Standards.

SAFETY POLICY

Safety and health in our company must be a part of every operation. Without question, it is every employee's responsibility at all levels.

We will maintain a safety and health program conforming to the best practices of organizations of this type. To be successful, such a program must embody the proper attitudes toward injury and illness prevention on the part of supervisors and employees. It also requires co-operation in all safety and health matters, not only between supervisors and employees, but also between employees and their co-workers. Only through such a cooperative effort can an effective safety and health program be established and preserved.

The safety and health of every employee is a high priority. Management accepts responsibility for providing a safe working environment and employees are expected to take responsibility for performing work in accordance with safe standards and practices. Safety and health will only be achieved through teamwork. Everyone must join together in promoting safety and health and taking every reasonable measure to assure safe working conditions in the company.

Our commitment is to:

S) *Clearly define for all staff their accountabilities and responsibilities for the development and delivery of Fire safety strategy and performance;*

b) Minimize the risks associated with operations to a point that is as low as reasonably practicable/achievable;

- c) Ensure that externally supplied systems and services that impact upon the safety of our operations meet appropriate safety standards;*
- d) Actively develop and improve our safety processes to conform to world-class standards;*
- e) Comply with and, wherever possible, exceed legislative and regulatory requirements and standards;*
- f) Ensure that all staff are provided with adequate and appropriate safety information and training, are competent in safety matters and are only allocated tasks commensurate with their skills;*
- g) Ensure that sufficient skilled and trained resources are available to implement safety strategy and policy;*
- h) Establish and measure our safety performance against realistic objectives and/or targets;*
- i) Achieve the highest levels of safety standards and performance in all our activities.*
- j) Continually improve our safety performance;*
- k) Conduct safety and management reviews and ensure that relevant action is taken; and*
- l) Ensure that the application of effective safety management systems is integral to all our activities, with the objective of achieving the highest levels of safety standards and performance.*

The meaning of the word "Safety" shall be taken as "the state of being safe and free from danger" for the purpose of this manual.

The safety in general terms shall be applicable to the following:

- S)** *Personnel employed directly or indirectly by the company in office or the work sites.*
- b. Buildings, offices and such other structures where the personnel, equipment and materials are stored or deployed by the company or the co-occupants of such buildings, offices, yards, godowns, stores and such other structures.*
- c. Temporary erection structures being installed by this company or any other to which this company has a direct or indirect involvement with respect to the execution of a contract.*

Broad Line Plans to achieve the safety shall be as follows:

- S)** *By setting up a safety organization as suited to the functioning of the company.*

- b. Imparting and insisting on training of all the employees at all the levels on the necessity of adhering to safety measures being adopted by this company and as promulgated by statutory bodies.*
 - c. Conducting Safety Audit from time to time, recommending improvement on safety measures and implementing them with the approval of the Operations Manager.*
 - d. Conducting safety meetings at sites, head/branch offices.*
 - e. Accident investigation with respect to the cause of the accidents and measure that could have been adopted to avoid it.*
 - f. Regular Safety Inspections through check lists for routine activities and specific activities.*
 - g. Propagating the company's safety policies at all its sites and offices.*
 - h. Insisting on use of safety gear commensurate with the requirement of the situation of deployment.*
- S)** *Displaying sign boards indicating hazards of specific activities. Eg: "NO SMOKING", "USE SAFETYSHOES", "USE HELMETS" etc.*

The ultimate expression of policy lies in how we carry out our business. Our general business policy focuses on six areas: ethical conduct, employee relationships, health, safety, environmental concerns, finance and control. What we state here is not only an aspiration, but also a determination. The policy document describes what the Company expects of its people and what society can expect of the company.

We believe that wherever we operate, our activities should generate economic benefits and opportunities, our conduct should be a source of positive influence, our relationships should be honest and open, and we should expect to be held accountable for our actions.

We are committed to:

- Respect the rule of law; conduct our business with integrity, and show respect for human dignity and the rights of the individual wherever we do business.*
- Develop employment practices that create a stimulating working environment in which diversity is valued.*
- Create mutual advantage in all our relationships so that people will trust us and want to do business with us.*
- Demonstrate respect for the natural environment and work toward our goals of no accidents, no harm to people and no damage to the environment.*
- Manage our financial performance to maximize long-term benefits to our shareholders and employees.*

In our actions and our dealings with others, we will:

- *Respect the rule of law.*
- *Promise only what we expect to deliver, only make commitments we intend to keep, not knowingly mislead others and not participate in or condone corrupt or unacceptable business practices.*
- *Meet our obligations and commitments, treat people according to merit and contribution, refrain from coercion and never deliberately do harm to anyone.*
- *Act in good faith, use company assets only for furthering company business and not seek personal gain through abuse of position.*

We will work to build long term relationships founded upon:

- *High performance standards.*
- *Delivering on our promises.*
- *Openness and flexibility.*
- *Learning from others*
- *Mutual interdependence*
- *Sharing success*
